

- N.B.** (1) All questions are **compulsory**.
 (2) **Figures** to the **right** indicate **full** marks.
 (3) Use of **simple calculator** is **allowed**.
 (4) **Graph papers** will be provided on **request**.

Section I

1. Attempt any **four** from the following :—

- (a) Find derivative of y with respect to x . 5
 (i) $y = 4x^7 - \log x + \sqrt{x}$
 (ii) $y = (x + e^x)(\log x - 10)$
 (b) The total cost function is given by $C = x^2 + x + 10$. 5
 Find the average cost and marginal cost when x is 20.
 (c) Examine the points of maxima and minima for the function $f(x) = x^3 - 6x^2 + 9x$. 5
 (d) If the demand function is given by $D = 15 - 4p + p^2$. 5
 Find the price elasticity of demand when price is 5.
 (e) The demand function of a commodity is given by $p = 18 + D - D^2$. 5
 Find the total revenue and marginal revenue function.

2. Attempt any **four** from the following :—

- (a) A principal amounts to ₹ 11,880/- after 4 years and to ₹ 14,040/- after 7 years. 5
 Find the principal and the rate of simple interest.
 (b) Amit keeps a fixed deposit of ₹ 25,000/- in a bank for 3 years. If the rate of interest 5
 is 10% per annum compounded annually, find the total amount he will receive at
 the time of maturity after 3 years.
 (c) Bhavin promised to pay Ketan ₹ 3,66,025/- after 4 years. If the rate of interest is 5
 12% per annum, find its present worth.
 (d) Find the amount at the end of 1 year of an annuity of ₹ 5,000/- payable at each 5
 quarter with rate of interest 12% per annum.
 (e) Rehan takes a loan of ₹ 30,000/- to be repaid in one year at 9% per annum by 5
 reducing balance interest rate. Find the Equated Monthly Instalments (EMI).

[TURN OVER

Section II

3. Attempt any **four** from the following :—

- (a) Regression line of y on x is $3x - 2y - 6 = 0$ and that of x on y is $8x - 3y - 44 = 0$ 5
Find (i) Coefficient of Correlation between x and y (ii) Mean values of x and y .
- (b) Calculate Spearman's Rank Correlation coefficient for following data. 5

x	42	40	52	57	36	42
y	102	100	105	103	110	105

- (c) Define Correlation and explain the method of Scatter Diagram for deciding the type of correlation. 5
- (d) Calculate Product Moment Correlation from the following data : 5
 $\sum (x - \bar{x})(y - \bar{y}) = 29$; $\sum (x - \bar{x})^2 = 28$; $\sum (y - \bar{y})^2 = 42$
- (e) The following data relates the Age of husband and wife. Estimate the age of wife when husband is aged 23. 5

	Husband	Wife
Mean Age	27 years	23 years
Std.Dev. of age	3 years	2 years

The Coefficient of Correlation $r = 0.93$

4. Attempt any **four** from the following :—

- (a) What is Time Series ? Describe the components of a time series with suitable examples. 5
- (b) Calculate the Cost of Living Index for the year 2004 by family budget method from the following data : 5

Group	Price in 2000	Price in 2004	Expenses on
Food	100	110	40%
House- rent	85	25	15%
Clothing	80	100	20%
Fuel	40	60	10%
Miscellaneous	50	55	15%

[TURN OVER

- (c) Fit a straight line trend by the method of least squares and hence estimate the sales for 2010 from the following data : 5

Year	2005	2006	2007	2008	2009
Sales	11	15	12	13	19

- (d) For the following data construct the Fisher's Price Index Number : 5

Commodity	2014		2016	
	Price in ₹	Quantity	Price in ₹	Quantity
A	4	10	5	12
B	3	8	6	10
C	2	8	3	9
D	5	4	8	5

- (e) Find trend values by 4 yearly centered Moving averages method : 5

Year	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
Export	15	20	25	32	40	48	56	64	70	75

5. Attempt any four from the following :—

- (a) An unbiased coin is tossed 4 times. What is the probability of getting i) 3 heads, 5
(ii) at least one head.
- (b) If X is a random variable following Poisson distribution with relation 5
 $4P(X = 0) = P(X = 1)$ Obtain $P(X = 3)$.
(Given $e^{-4} = 0.0183$)
- (c) Enumerate the important properties of Normal Distribution. 5
- (d) If the weight of 10000 soldiers in a regiment is normally distribution with mean 5
72 kgs and standard deviation of 5 kgs. Find the percentage of soldiers with weights between 70 and 77 kgs.
(Given area under the standard normal curve between $Z = 0$ and $Z = +1$ is 0.3413 and between $Z = 0$ and $Z = 0.4$ is 0.1554).
- (e) The average number of phone calls per minute in a call center is 4. Find the 5
probability that during a specific minute, the number of calls is (i) only 2
(ii) less than 2.
(Given $e^{-4} = 0.0183$)
